Letters of Transmittal

To The Honourable Frederick W. Johnson
Lieutenant Governor of Saskatchewan

May It Please Your Honour:

I herewith submit for your consideration the Annual Report of The Workers' Compensation Board for the Calendar Year 1986.

Respectfully yours,

Minister of Human Resources,
Labour and Employment

The Lieutenant Governor in Council

Sir:

We are pleased to submit the fifty-seventh Annual Report of the Saskatchewan Workers' Compensation Board for the year ending December 31, 1986.

Respectfully submitted,

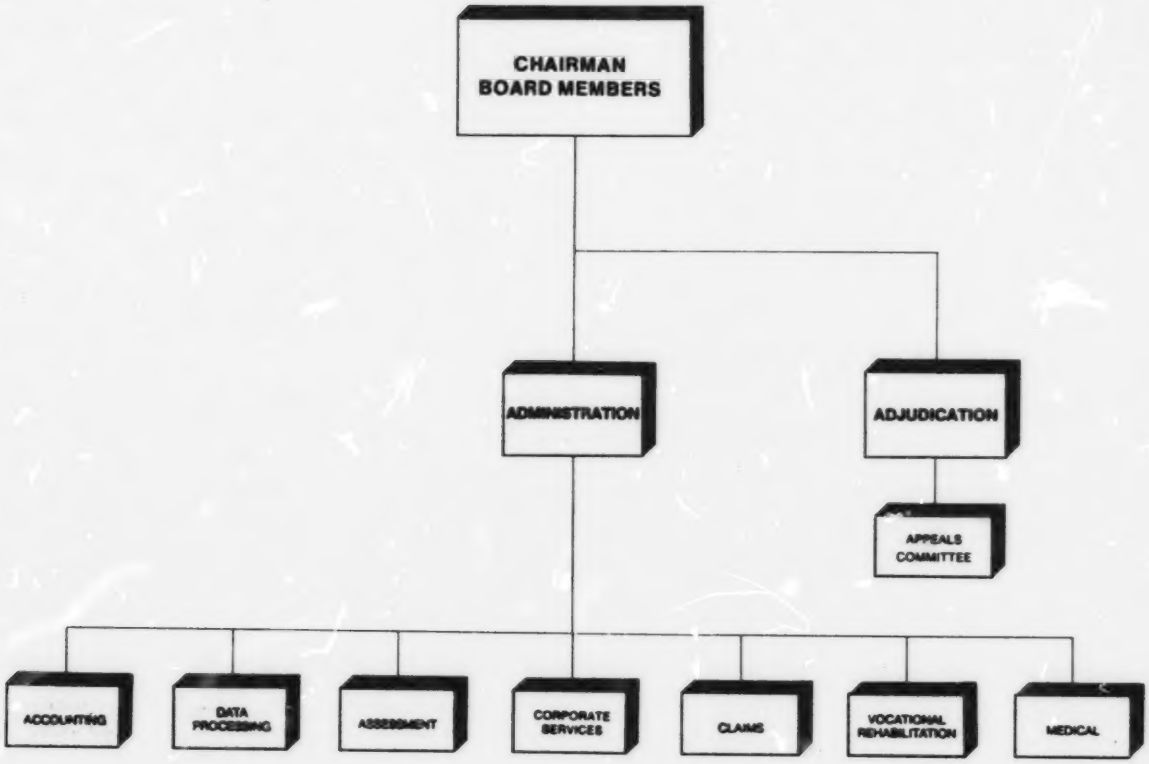
Garnet Garven
Chairman

Philip J. Leduc
Board Member

Robert McWillie
Board Member

Ernest R. Moody
Board Member

Organizational Chart



Committee of Review

Section 162 of The Workers' Compensation Act, 1979 reads:

> "162 (1) The Lieutenant Governor in Council shall, at least once every four years, appoint a committee of review, consisting of five or more members as the Lieutenant Governor in Council may determine, to review and report upon any matters concerning this Act and the regulations that the Lieutenant Governor in Council may specify."

The legislation requires that a Chairman be appointed together with members of the committee composed with equal representation by employers and organized employees.

On October 28, 1986, a Committee of Review was appointed with the following representation:

Wes Norheim	Canadian Labour Congress
Gerry Munt	Saskatchewan Federation of Labour
Greg Zaba	Construction Unions
Virginia Kutzan	Saskatchewan Union of Nurses
Eric Antonini	Antonini and Sons Limited
Norm Brown	Degelman Industries Limited
Denis Magnan	Federated Co-operatives Limited
Glen Maxwell	Cory Division Potash Corporation of Saskatchewan.

Judge Alastair Muir, who has served on three previous Committees of Review, was appointed Chairman.

The Committee of Review held public hearings in Regina, Saskatoon and Prince Albert during the spring of 1986 and received almost 300 submissions. The Committee held a number of meetings with The Workers' Compensation Board and delivered a unanimous Report to the Honourable Grant Schmidt in the fall of 1986.

The comprehensive Report made 71 recommendations ranging from increased legislated benefits to internal administrative matters. The Board is currently reviewing the details of the recommendations and actuarially costing the proposals. More details on the implementation phase will be presented in next year's Annual Report.

Assessment

The primary function of the Assessment Department is to collect the revenues necessary to pay for the services provided by The Workers' Compensation Board. This goal is achieved by the collection of assessments levied against the payrolls of employers. The process involves:

Identification, Indexation and Registration

Most industries are covered by the provisions of The Workers' Compensation Act, 1979. Identification, indexation and registration assure that an accurate list of these employers is maintained at all times.

Classification

While liability is placed on all industry collectively, the industries covered by the Act are divided into various classes and sub-classes for assessment purposes. Separate records are kept of assessment received and injury costs for each industry classification. Each class is in essence a mutual insurance association of the employers comprising the class.

Industry Rate Schedule

In 1986, the industry rate schedule was expanded from the concept of one code and one rate to a system whereby most industry codes now bear a low, medium and high rate of assessment. The number of individual rates were increased from 44 to 92. This was implemented in response to employer representation to provide a more equitable assessment system. Rates are set closer to actual costs with employers in codes costing less paying less and vice versa. While the codes bear more rates, the principle of collective liability is maintained since all employers in the same occupational group maintain the same rate of assessment.

Assessment

All employers covered by the Act are required by the last day of February to file a return showing the actual wages paid during the preceding year together with an estimate of the payroll for the current year. Assessment is made on the estimated payroll subject to adjustment when actual payroll is submitted the following year. During 1986, 33,713 employer accounts were processed.

Assessment rates are established after considering cost experience, the financial position of each industry classification, the reserves required for outstanding claims and pensions, and the cost of administration of the Act. The rates have remained relatively stable for several years and the Board is proud that the average assessment rate for Saskatchewan — $1.37 in 1986 — continues to be one of the lowest in Canada.

Prior to finalizing the rates for the coming year, the Board meets with all major employer associations. During 1986 the Board met with 23 employer groups including the Saskatchewan Chamber of Commerce. The Board is committed to this process as the exchange of information and ideas promotes greater understanding on the part of both parties.

Receivables and Collections

The assessment of payroll records generates employer levies which are payable in two installments: April 1 and September 1. Every effort is made to ensure prompt payment.

Audit

Through the Audit/Assessment services provided by both of the Regina and Saskatoon offices, 1,649 employers were audited during 1986. The auditing process provides verification of payroll and other employer records, expedites collections, and informs employers of changes in the workers' compensation system.

Clearances

A clearance is a letter from the Board stating that the contractor's assessment account is in good standing. Clearances are required in principal/contractor relationships only and is most common to construction projects. During the year there were 45,920 clearances issued.

Clearances are required because compensation is unlike any other form of insurance. A worker who sustains an injury is entitled to the benefits even though the employer's assessment account may be unpaid. In addition, the new clearance procedure helps to identify employers, enables collection of unpaid assessments and thereby ensures that all businesses carry their fair

share of the assessment levy. To expedite clearances, the Board has computerized the clearance process and implemented a toll free number. Telephone inquiries receive immediate response and written requests usually receive same day service.

Cost Statements

The monthly cost statements were revised during the year to provide employers with more pertinent information. The statements outline specifics about individual claims accruing to the employer as well as related costs. This allows employers to measure their performances against the standards for the industry. In addition, a second statement was developed to give employers the source, cause and nature of injury. This statement is updated on a quarterly basis.

These statements help employers to quickly and accurately analyze their injury experiences. Injury and accident statistics play an important role in accident prevention, therefore the use of the enhanced statement should assist in this process. These statements are made available on a request basis to all employers.

Merit Rebate Program

To encourage safety in the work place and reduce injury costs, merit rebates of up to 25% of the previous year's assssment are available to employers with excellent injury cost experience. It is estimated that 18,295 rebates will be paid to employers totalling $6,568,724 for 1986.

Relocation

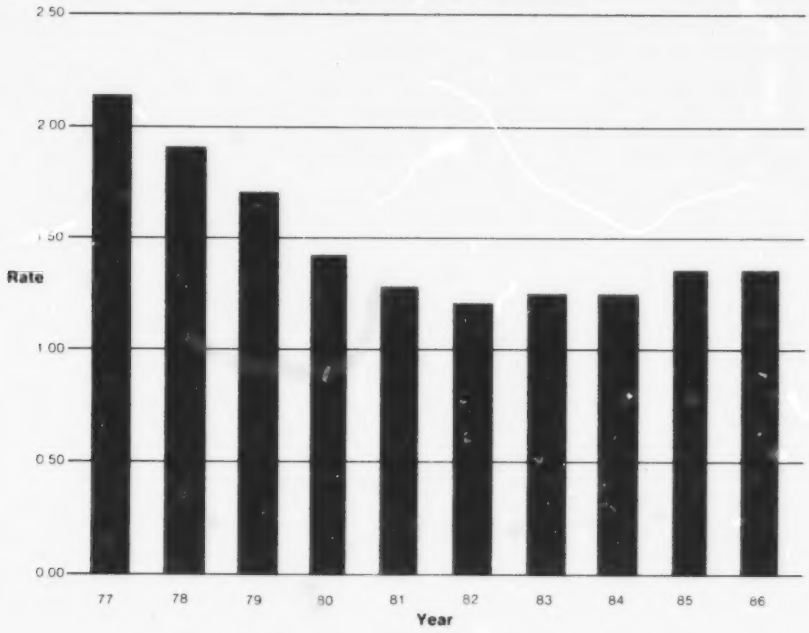
To accommodate space requirements and to provide better service the Assessment Department in Regina was relocated to the 13th Floor of the Regina City Hall.

Statistics

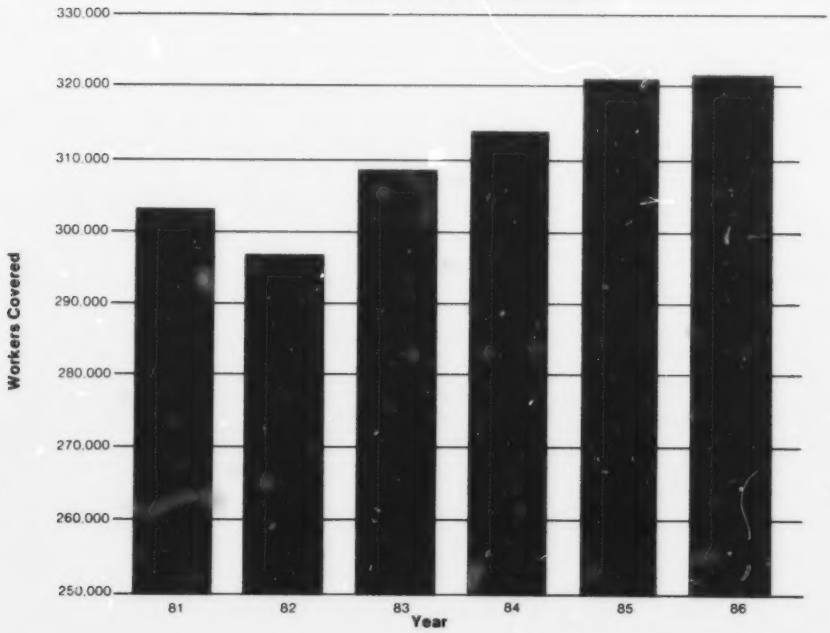
Year	Assessment Ceiling	No. of Employer Accounts Processed	Assessable Payroll	Average Rate of Assessment
1977	16,000	25,092	2,259,061,528	2.16
1978	18,000	26,019	2,778,331,505	1.92
1979	20,000	27,444	3,180,479,750	1.70
1980	22,000	28,822	3,629,755,085	1.42
1981	24,000	29,763	4,171,506,376	1.31
1982	26,000	30,236	4,509,447,272	1.22
1983	29,000	31,406	4,911,391,895	1.27
1984	33,000	32,199	5,313,546,946	1.27
1985	33,000	32,743	5,522,560,424	1.37
1986	34,000	33,713	5,713,490,312*	1.37*

* Provisional

Average Rate of Assessment



Workers Covered by Compensation



Claims

The primary objective of the Claims Department is the prompt and accurate adjudication of a wide variety of injury claims.

The accomplishment of this goal requires the co-ordination of several specialized and interrelated areas:

Registry
The function of this area is the registration of new claims plus the identification of the hundreds of incoming documents on existing claims. In addition, Registry sends initial requests for reports to employers, workers and health care practitioners. Speed and accuracy are essential to the registration process and most tasks are completed within twenty-four hours of receipt of information.

During the year approximately 170 new claims were set up daily and records were maintained on the over one million claims currently on file.

Filing
Each day approximately 700 documents are received and placed in existing claim records and distributed to the appropriate areas for adjudication and processing. A computerized file tracking system is planned for the fall of 1987 to improve efficiency and improve client service.

Medical Accounts
This section is responsible for the prompt payment of the thousands of accounts received from doctors, hospitals and other health care practitioners. The majority is processed within fifteen days with at least 90% of accounts handled within thirty days of receipt.

Claims Adjudication Units
Claims officers are responsible for the development and adjudication of all work injuries involving loss of time and earnings beyond the day of injury. Decisions are based on information obtained from the injured worker, employer, health care professional and other appropriate parties.

The majority of disabling injury claims are uncomplicated and involve time loss of less than twelve weeks. The balance consists of the more serious and complicated or longer-term injuries often requiring extensive participation by the Medical and Vocational Rehabilitation Departments. During September of 1986, an important initial restructuring step was implemented with the creation of two adjudication areas: primary and extended adjudication. This division of workload will improve client service through greater efficiency and consistency in adjudication.

Claims Representatives
Some claims require additional investigation for adjudication purposes. Claims Representatives are responsible for acquiring this information through personal contact with individuals involved. These Claims Representatives conducted 857 investigations during the year.

Data Entry
Calculation of bi-weekly compensation and related injury expenses authorized by Claims Officers is the primary function of this area. As a service to workers and employers, this area issues letters detailing deductions and calculations of earnings loss compensation. This service came into effect in September of 1986.

Earnings Replacement Committee
Injuries that result in long-term loss of earning capacity necessitating a job change are referred to the Earnings Replacement Committee for continuation of benefits and annual review. The Committee works closely with the Vocational Rehabilitation and Medical Departments in order to establish entitlement.

Statistics
A total of 37,034 claims were settled during 1986, a decrease of 1.1% compared to the 37,437 settled in 1985. Settled injuries do not include claims on which no action was taken, claims disallowed and duplicate claims.

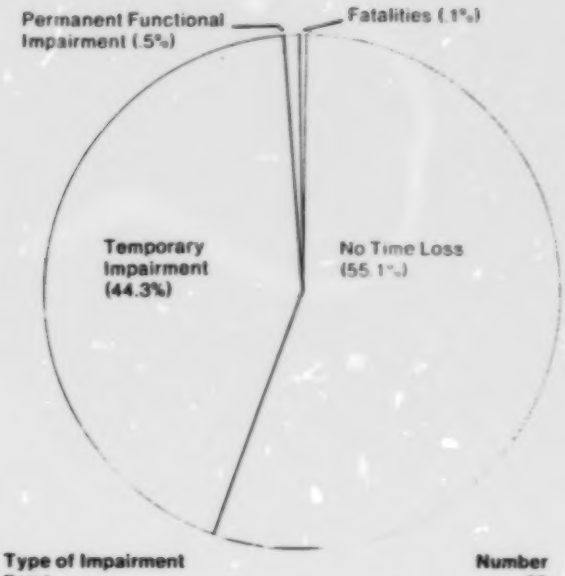
Approximately 45% of settled claims involve time loss beyond the day of injury.

Upon request prior claims may be reviewed and further entitlement authorized if warranted. In 1986, a total of 2,986 existing claims were re-opened.

The total number of permanently impaired workers and dependants of fatally injured workers in receipt of payments as of December 31st were:

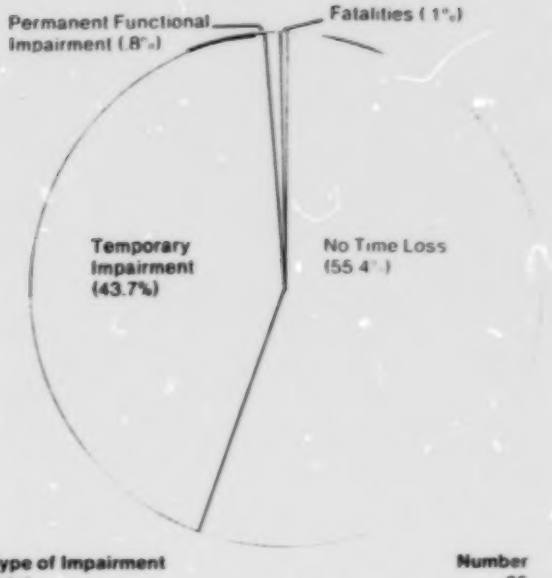
Prior Legislation	1982	1983	1984	1985	1986
Disabled Workers	5,342	4,408	3,205	2,379	2,487
Spouses	483	458	415	405	418
Children	329	300	245	199	176
Other Dependents	6	5	5	5	20
Workers' Compensation Act, 1979					
Long Term Disability	45	225	323	622	685
Spouses	94	119	133	134	126
Other Dependents	14	42	25	37	42

Claims 1986 – 37,034



Type of Impairment	Number
Fatal	29
Permanent Functional Impairment	190
Temporary Impairment	16,402
No Time Loss	20,413
Total	37,034

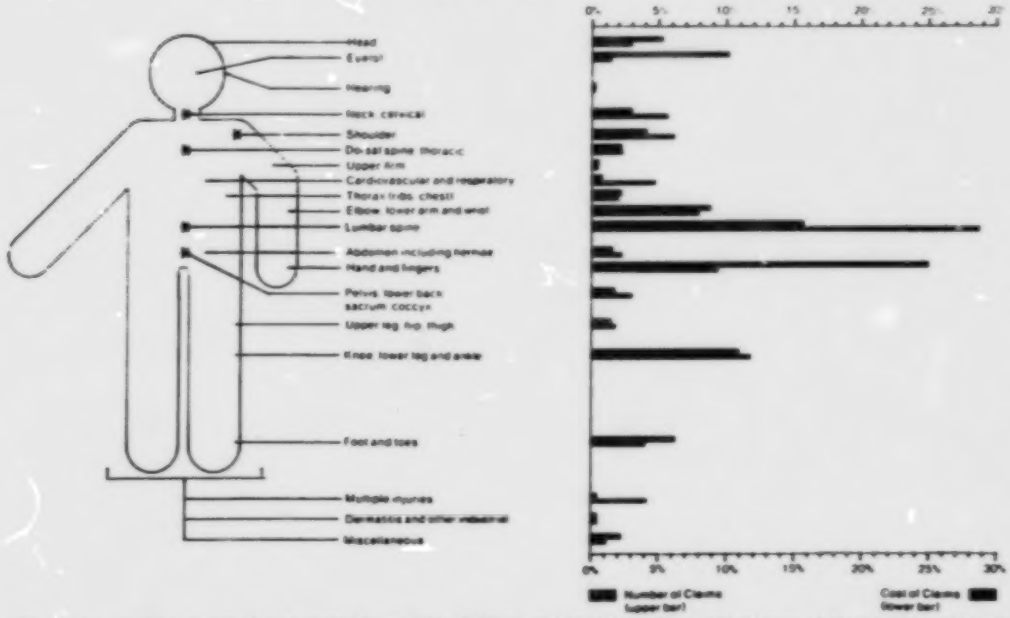
Claims 1985 – 37,437



Type of Impairment	Number
Fatal	25
Permanent Functional Impairment	318
Temporary Impairment	16,369
No Time Loss	20,725
Total	37,437

Area of Injury

Claims Settled in 1986



The above portrays the breakdown of claims settled by areas of injury. It is worth noting that 25.9% of all settled claims were back-related injuries.

Vocational Rehabilitation

Vocational Rehabilitation Counsellors located in both the Regina and Saskatoon offices travel throughout the province to assist injured workers in returning to employment. The Department's goal is to eliminate or minimize the effect of injury on the worker's earning capacity.

The Workers' Compensation Board places a great deal of emphasis on the successful vocational rehabilitation of injured workers. Benefits of a successful return to employment accrue not only to injured workers and their families but also to industry, the local community and society as a whole. To promote a successful return to employment, the Vocational Rehabilitation Department tailors its services to the unique physical and intellectual capabilities of the injured worker.

During the year, 2,666 cases were provided with vocational rehabilitation assistance of which 1,443 were brought to a resolution and closed from active contact. Of the concluded cases, 766 workers were successfully re-employed.

In returning an injured worker to productive employment, the following services may be provided:

Counselling

Instructions regarding job search techniques, selecting the appropriate type of employment and help in adjusting to a disability are some of the services provided.

Vocational Assessment

Involves the evaluation of the worker's physical and intellectual abilities, aptitude and interests to assist in deciding on an appropriate occupation.

Job Placement

Financial assistance, in the form of compensation benefits, may be provided to an injured worker actively engaged in directed job search activities. Appropriate counselling is provided to the worker by the Vocational Rehabilitation Counsellor to maximize job search efforts. In 1986, 748 workers received job search assistance totalling $2,956,382.

Following a return to suitable employment with a temporary wage loss, 373 workers were granted temporary wage loss support totalling $1,041,364.

Financial assistance in the amount of $43,385 was extended to 87 workers to enable them to travel for employment search or testing. Also, 32 workers were required to relocate in order to secure suitable employment. Those workers received financial assistance at a total cost of $14,473.

Work Assessment

On the job assessment may be arranged to determine if the worker has the capability of performing a specific type of occupation. Such assessments were arranged for 143 workers at a cost of $429,886.

Training on the Job

Assistance is supplied to employers in order to provide workers with an opportunity to train in a particular occupation and who are willing to offer permanent employment once training is completed. There were 63 workers sponsored for training on the job at a cost of $176,560.

Academic and Technical Training

Financial aid may be provided to an injured worker to help in acquiring the education necessary to obtain employment. In 1986, 217 workers received academic upgrading costing $1,417,816 and 324 workers received technical upgrading costing $1,574,634.

Follow Up Service

Continued contact is provided to the injured worker and other concerned parties to ensure that suitable employment has been obtained and to provide payment of temporary wage loss if applicable.

To aid dependent spouses of deceased workers in entering the labour force, the Vocational Rehabilitation Department provides the same services available to injured workers.

Continued counselling and assistance is also provided to injured workers prevented from obtaining employment due to severity of injury.

To fully implement its progress, the Vocational Rehabilitation Department receives the help of many employers, unions, agencies and individuals. Their assistance is greatly appreciated.

Trends and Initiatives — Employment Focus

The general economy has resulted in a direct impact on the availability of suitable employment for injured workers. Accordingly, the Board will be devoting two Rehabilitation Counsellor positions to develop employment options through direct contact with the province's employers.

To provide more opportunities for employment, greater emphasis has also been placed on upgrading and other educational sponsorship.

Statistics

	1982	1983	1984	1985	1986
Academic Educational Upgrading					
Injured Workers	89	123	177	193	217

Total Cost	$103,115	$136,159	$219,656	$210,087	$176,560

Medical

Consisting of six physicians, the Medical Department acts in a consultant role on medical matters to non-medical personnel; manages the Physical Rehabilitation Program; and performs a public relations function with practicing physicians. The Medical Officers were selected for their medical knowledge and good judgement, one of which has a background in orthopedic surgery. During 1986, one of the Medical Officers successfully completed certification examinations to become a specialist in occupational medicine. Because medical knowledge is dynamic, continuous review of medical literature as well as professional upgrading is required.

The majority of claims for traumatic work injury are straightforward medically, however, a smaller number involve pre-existing disease, complicated traumatic injury, psychiatric disease or occupational disease where Medical Department opinion is sought regarding the relationship between disease and work injury. Also, Medical Officers are required to provide informed opinions regarding fitness for work and work limitations with respect to vocational rehabilitation of injured workers.

At times the complicated nature of a worker's injury or conflicting opinions regarding diagnosis, treatment or fitness for work, require the Medical Department to seek additional expertise. As an extension of the Medical Department, a panel of appropriate consultants, referred to as a "Medical Board" is then asked to examine the worker and answer specific medical questions. The Medical Department also derives benefit from the decisions of Medical Review Panels which constitute the final level of appeal for injured workers with regard to medical matters.

In some instances, workers are left with permanent functional impairment which is ordinarily assessed by the Medical Officers. On occasion, because of the specialized nature of the injury, the Medical Department arranges for the permanent functional impairment to be assessed by panels of appropriate consultants.

The Workers' Compensation Board has a responsibility to ensure that injured workers receive appropriate and timely medical treatment. This involves communication between the Medical Officers and attending physicians and, at times, referral to specialists for consultation of physical rehabilitation treatment. Such communication is essential and accordingly, procedures were updated in 1986 to ensure that chiropractors as well as physicians receive appropriate and timely information.

The availability of appropriate treatment as close as possible to the worker's residence is a major concern. To this end, the Medical Department communicates with the University of Saskatchewan Department of Continuing Medical Education to make educational opportunities available to practising physicians and therapists.

The Medical Department is involved in planning for increased and improved physical rehabilitation services at the Wascana Rehabilitation Centre as well as enriched physical therapy at various locations within the province. During the year, arrangements were made to have private physical therapy clinics in Regina, Saskatoon and Prince Albert provide counselling, muscle strengthening and physical fitness supervision in addition to conventional physiotherapy modalities, to injured workers. Should this prove effective, more physical therapy clinics will be added in the future.

Physical Rehabilitation

Physical Rehabilitation Program

Rehabilitation is a key function of The Workers' Compensation Board. The process of physical rehabilitation commences immediately after injury with first aid at the job site and transportation to initial medical attention. It continues through the stage of medical management, convalescence, and remedial medical treatment. The objectives of physical rehabilitation are to minimize the effects of injury and promote recovery in the shortest time possible with successful vocational rehabilitation as the final goal.

In the majority of cases, physical rehabilitation is achieved in the worker's community under the supervision of the attending physician. However, there will always be a small number of injured workers who require a highly specialized, co-ordinated physical rehabilitation program. Such a program is provided at the Wascana Rehabilitation Centre in Regina. This program is co-ordinated by an experienced physician who is part of a treatment team consisting of physiotherapists, remedial gymnists, occupational therapists, work unit personnel, a psychologist, a clinic nurse, Workers' Compensation Board representatives, and local medical consultants.

Injured workers are provided with a full-time, five day per week, out-patient program.

Treatment is prescribed according to the needs of the individual and modified according to the response to treatment. Prior to discharge, most of the workers receive some work conditioning while those who will be left with permanent restrictions are given a work assessment.

As vocational rehabilitation is an integral part of Physical Rehabilitation, a Vocational Rehabilitation Counsellor is attached to the Physical Rehabilitation Program to ensure that the program is directed at the eventual vocational rehabilitation of the injured worker.

During the past year the program has been improved by adding an aquatic therapy program and a special education program for workers who have chronic back disease.

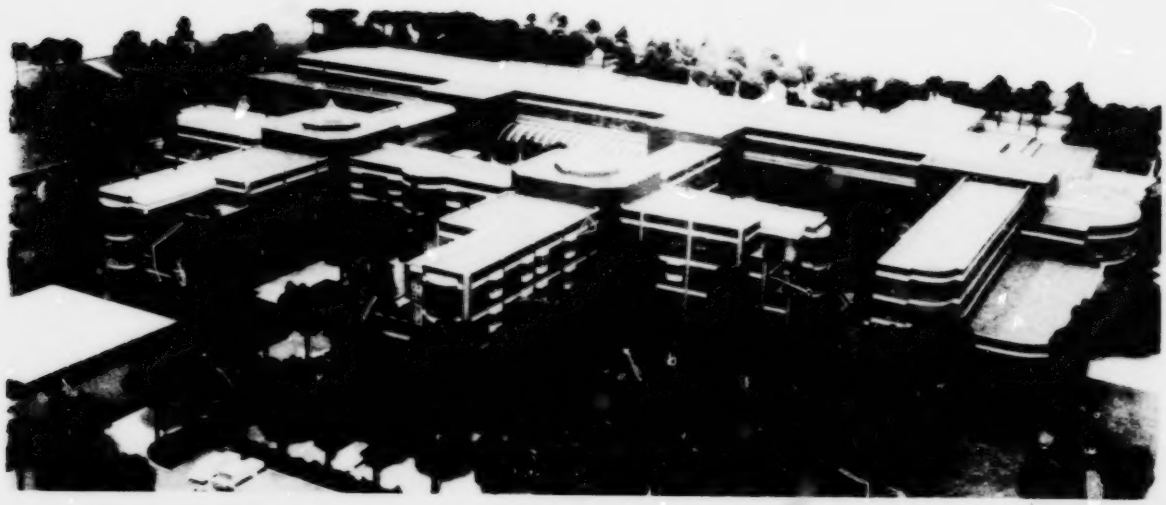
The science of physical rehabilitation has made major advances, including the use of new modalities of treatment and development of expertise in the control and management of chronic pain. With these advances has come an increased realization that injured workers must not only be physically rehabilitated, but must also be psychologically rehabilitated as well in order to achieve the best possible vocational rehabilitation.

Wascana Rehabilitation Centre

The Wascana Rehabilitation Centre Act received Royal Assent and Proclamation on May 14, 1986. As a result, the name of the old Wascana Hospital has been changed to the Wascana Rehabilitation Centre. The new Centre has a separate Board of Governors with two members appointed by The Workers' Compensation Board.

In keeping with the goal of providing the best available treatment services, The Workers' Compensation Board is financing nearly one quarter of the $50 million cost of the redevelopment of the Wascana Rehabiliation Centre. Construction of the 1st phase is on schedule and when it comes into service in 1989, the capacity to treat injured workers will triple. It is anticipated that early improved treatment will substantially reduce the disability periods and permanent impairment of injured workers.

The new facility will provide hostel, educational and recreational facilities as well as modern therapy equipment, and a much expanded and diversified industrial therapy department.



Appeals

Saskatchewan, like all Canadian Workers' Compensation jurisdictions, has a structure for the appeal of initial decisions. This structure includes defined access to information utilized in making a decision.

Appeals Committee

If a department of the Board is unable to determine an issue in favour of an individual, a full written explanation for this decision is provided. However, if an individual believes the decision reached was incorrect, an appeal can be made to the Appeals Committee.

The Appeals Committee is independent of the Board's line departments and has not been involved in the case before. This ensures a completely independent review of the initial decision. The Appeals Committee considered 666 cases during the year. On average, decisions of the Committee were provided within 26 days of the appeal reaching Board offices and are fully explained to the appellant in writing. While the Committee does the majority of its work in Regina, it will travel throughout the province as required.

Board Hearings

Appeals against decisions of the Appeals Committee may be made to the Members of the Board. Like the Appeals Committee the Board Members have not been involved in the case before. This ensures a second totally independent review of the initial decision. In addition to holding hearings in Regina the Board Members meet regularly in Saskatoon to accommodate persons from that city and the northern part of the province.

During 1986, the Members of the Board considered 157 appeals. Their decisions are fully explained in writing to the individual.

Medical Review Panels

An injured worker or a dependent of a fatally injured worker may appeal an unfavourable decision from the Board Members to a Medical Review Panel should there be a bona fide medical question to be resolved. Medical Review Panels are held in both Regina and Saskatoon and their decisions are binding on both the appellant and the Board. During the year, 11 workers had their cases ruled upon by Medical Review Panels.

Statistics

Source of Appeals	Appeals Committee	Board Members
Worker	63.5%	42.7%
Worker's Advocate Office	15.8	31.2
Lawyer	6.1	8.3
Employer	4.1	4.5
Union Representative	3.2	5.7
Worker Representative	2.5	5.1
Doctor	2.2	0.6
Elected Official	1.4	0.6
Other	1.2	1.3
	100.0%	100.0%

Chiropractic Consultant

A significant number of claims submitted to The Workers' Compensation Board involve chiropractic care. To ensure promptness and accuracy in the processing of these claims, the Board uses the services of a Chiropractic Consultant. During 1986, this individual dealt with over 350 claims.

The Consultant, who is in private practice, provides expert advice to appropriate Board personnel regarding the necessity, type, effectiveness and length of chiropractic treatment. In 1986, approximately 39,000 chiropractic treatments were provided to injured workers.

Chiropractors are contacted as required by the Consultant and general information regarding duties, responsibilities and rights under the legislation are explained.

The Consultant is also involved in other activities designed to maintain and improve upon the excellent communication that the Board has with the province's chiropractors.

Other Services

Corporate Services

Effective 01 October 1986, a new department entitled Corporate Services was created to bring together three sections of the Board into a more formal structure for better continuity and efficiency of those internal functions. Those sections are: Human Resources, Office Services, and Research and Information.

Staff Training and Development

A new emphasis was placed on the upgrading of Board staff in order to (i) better prepare employees to deal with the increasingly complex nature of their work (ii) provide better service and (iii) better prepare employees for promotion.

Information Services

Staff members from both the Regina and Saskatoon offices participated in a number of farm and industrial shows as well as making presentations to various employer, labour and general interest groups.

Data Processing

The Board's Data Processing System is a national leader in many respects. Developed by Management Systems Ltd., the system won for that firm the ABEX Award for the best new Saskatchewan product. The Board's offices have been visited by many Workers' Compensation organizations in both Canada and the United States to observe our system. Many of those organizations have copied or implemented similar system designs.

The computerized daily operations are carried out by all Departments using terminals linked to the Saskatchewan Computer Utility's main frame hardware. The methodology being used provides a very sophisticated on-line, real time system which allows for up-to-the-minute information to be available throughout the organization.

One of the many benefits of the system is the capture of vast amounts of statistical data with respect to work related injuries and industrial diseases which is used to provide information to WCB Management, Occupational Health and Safety, employers and safety associations.

Computerized applications are continually being developed, adding new or expanded functions to replace manual operations. Even with the rapid expansion and demand for computerized services, the staff complement of the Data Processing Department has remained small and efficient.

Table 1

Employers Assessed by Industry Code During 1986 With Payroll Estimates for the Year

Investments

The Board has adopted a conservative investment policy to fully protect injured workers and their employers.

The current guidelines of the policy are:

1) Meet all legislative requirements.
2) Maintain a position of full funding of liabilities.
3) Maintain adequate reserves.
4) Maximize return within acceptable risk and
5) Match income to cash flow.

The consistent application of these guidelines contributes to the Board's ability to maintain a stable assessment rate structure. Our current rates are among the lowest in Canada.

In 1986, the portfolio increased by $24,620,776 to $285,339,349. The long term bond index outperformed all other asset classes during 1986 and as a result we were able to sell bonds realizing substantial gains on amortized cost and reinvest to improve yield and increase term. Exhibit 2 details these transactions and illustrates that an income gain of $7,815,863 was realized.

Asset mix is reviewed quarterly to match future income with projected liabilities. Certain long term liabilities are subject to inflation increases and efforts are made to match these commitments with equity income. During 1986, our equity holdings increased from 3% to 10%. Our objective is 25% over the next 5 years subject of course to review.

During the year, certain high quality long term bonds were dedicated to provide cash flow for pre-1980 disability pensions, widows' and children's allowances. This intended to match those future liabilities with guaranteed future income.

Total investment income for 1986 was $40,386,513 a yield of 13.4% as compared to 11.9% in 1985.

The Board continues to explore all possibilities in maintaining a sound financial program.

Exhibit 4

Government of Canada Deposit Account
Year Ended December 31, 1986

Balance due Board, beginning of year		$ 19,018
Receipts		1,817,762
Billings during year		
Compensation	$1,361,659	
Medical Aid and Rehabilitation	303,408	
Administration	247,017	
Adjudication Fees	84,757	1,996,841
Balance due Board, end of year		$ 198,097

Exhibit 5

Pension Reserve Transactions
Year Ended December 31, 1986
(With comparative figures for the previous year)

	1986		1985	
Balance, beginning of year		$165,808,814		$161,004,435
Funding provided:				
For permanent disability and earnings loss	$16,831,922		$17,824,905	
Interest	13,000,000	29,831,922	13,999,485	31,824,390
		195,640,736		192,828,825
Amounts applied:				
Pension payments	21,092,112		26,669,096	
Annuity	464,119		350,915	
Transfer to Injury Fund	12,112,812	33,669,043	–	27,020,011
		$161,971,693		$165,808,814

(This is part of the Board's total liability for Compensation Payable $306,129,442.)

Exhibit 6

Disaster Reserve Transactions
Year Ended December 31, 1986
(With comparative figures for the previous year)

	1986	1985
Balance, beginning of year	$ 7,612,784	$ 4,822,866
Add:		
Transfer from Injury Reserve	6,324,919	7,250,000
	13,937,703	12,072,866
Deduct:		
Transfer to revenue to provide assistance for industry codes	4,824,919	4,460,082
Balance, end of year	$ 9,112,784	$ 7,612,784

Exhibit 7

Second Injury Reserve Transactions
Year Ended December 31, 1986
(With comparative figures for the previous year)

	1986	1985
Balance, beginning of year	$2,376,879	$2,376,879
Add:		
Transfer from Injury Reserve	1,243,125	1,730,057
	3,620,004	4,106,936
Deduct:		
Transfer to revenue to provide assistance for industry codes	1,243,125	1,730,057
Balance, end of year	$2,376,879	$2,376,879

Exhibit 8

Wascana Rehabilitation Reserve
Year Ended December 31, 1986
(With comparative figures for the previous year)

		1986	1985
Balance, beginning of year		$ 9,962,453	$ 8,778,353
Add:			
Transfer from Injury Reserve		2,942,000	1,515,395
		$12,904,453	$10,293,748
Deduct:			
Payments			
Wascana Rehabilitation Centre	$2,979,098		
Consultant Fees	30,655	3,009,753	331,295
Balance, end of year		$ 9,894,700	$ 9,962,453

Exhibit 9

Pension Rehabilitation Reserve
Year Ended December 31, 1986

Balance, beginning of year	–
Add:	
Transfer from Injury Reserve	$558,000
Deduct:	
Payment, to injured workers in training	–
Balance, end of year	$558,000

Exhibit 10

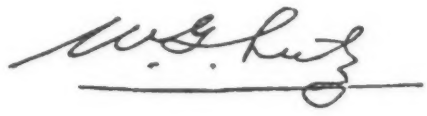
Auditor's Report

To the Members of the Legislative Assembly
of Saskatchewan

I have examined the statement of financial position of The Workers' Compensation Board (Saskatchewan) as at December 31, 1986 and the injury fund's and annuity fund's statements of operation and fund balance and the statement of changes in financial position for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the Board as at December 31, 1986 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year



Regina, Saskatchewan,
March 20, 1987.

W. G. Lutz, F.C.A.,
Provincial Auditor.

Actuary's Report

Consulting Actuary's Report
On The Valuation Of The Actuarial Liabilities
Of The Workers' Compensation Board
As at 31 December 1986

I have made the valuation of the actuarial liabilities of the Workers' Compensation Board as at 31 December 1986 and hereby certify that, in my opinion, the amount required at 31 December 1986 to make proper provision for future compensation, medical aid and rehabilitation expenses payable to injured workers and their dependents, on claims incurred prior to 1987, is $305,852,000. This amount does not include any amounts payable from the limited compensation reserve or the annuity reserve. This amount does not take advance credit for any portion of the future compensation, medical aid and rehabilitation expenses which might be paid out of the second injury reserve or the disaster reserve on claims incurred prior to 1987.

In my opinion:

(a) the assumptions made in the valuation upon which this report is based are appropriate for the purpose of the valuation;

(b) the methods employed are consistent with sound actuarial principles; and

(c) the data on which this report is based are sufficient and reliable for the purpose of the valuation.

L D Miller

(See accompanying notes to the financial statements)

Notes to the Financial Statements

December 31, 1986

1. Significant Accounting Policies

The Board's accounting policies are in accordance with generally accepted accounting principles. The following are considered to be significant:

a) **Investments**

(i) Bonds and debentures are recorded at cost at the time of purchase with any discount or premium amortized on a straight-line basis over the period remaining to the maturity date of the investment. Gains or losses on the sale of long-term investments prior to maturity are taken into or charged against revenue in the year of transaction.

(ii) Equities are accounted for on the "fair value" method. This method values equities on a five year moving average of market values thereby allowing for a gradual movement toward current quoted market values. American equities are translated into Canadian dollars at the year-end exchange rate, and translation gains or losses on these equities are included in investment revenue for the year.

(iii) Mortgages are accounted for on the same basis as bonds and debentures held as long-term investments.

(iv) Short-term investments have been stated at cost which approximates market.

b) **Depreciation**

Depreciation is provided on a straight-line basis commencing in the year in which the assets are placed in service. Office furnishings, building and computer equipment are depreciated at the rate of 10%, 2½%, and 20% per annum respectively and lease hold improvements over the term of the lease.

c) **Assessment Revenue**

At the beginning of each year, an assessment is levied on employers by applying their industry assessment rate to their estimated payrolls. The assessment levy is due and payable by installments within the current year. At year-end, assessment income is adjusted based on a review of the employers' actual payrolls.

d) **Merit Rebate**

To encourage safety practices and reduce injury costs the Board introduced a merit plan effective January 1, 1980. Employers who maintain an active assessment account for the latest three consecutive calendar years of not less than $15 in each year, and with claims cost under 60% of the assessment in the last year as well as in total over the last three years, will be eligible for a merit rebate if such exceeds $5 and the account is currently assessed and in good standing. Rebates are payable to a maximum of 25% of the levy in the last year. (Note 11).

e) **Staff Superannuation**

Superannuation costs for current services are being charged to operations on a current basis.

An actuarial review of the staff superannuation fund as at December 31, 1985 indicated an unfunded actuarial liability of $817,694. The Board has approved the actuary's recommendation of contributing at the rate of 1.9 to 1 of the required employee contributions effective January 1, 1986. The actuary estimates this ratio will retire the unfunded actuarial liability and provide for benefits to be earned by the members for service after December 31, 1985, over the anticipated working life of the contributors.

2. Status of Board

The Worker's Compensation Board (Saskatchewan) was established in 1930 pursuant to the provisions of The Workmen's Compensation Act, 1929 and is continued under The Workers' Compensation Act, 1979. The Board administers two funds which are the Injury Fund and the Annuity Fund. The Board does not maintain segregated investment portfolios for each fund.

3. Injury Fund

The Injury Fund represents all monies collected under The Workers' Compensation Act, 1979 and all expenses incurred in the administration of the Act.

4. Annuity Fund

The Board sets aside amounts equal to ten percent of compensation paid to workers injured after December 31, 1979 who have been on compensation for twenty-four consecutive months to provide an annnuity for the worker at age sixty-five. These amounts are charged to the Injury Fund Operations as Compensation, Medical Aid and Rehabilitation. The Board does not maintain a segregated investment portfolio for this fund and therefore investment income is allocated to this fund based on the average rate of return of the investments and the balance of the annuity fund.

5. Cash and Short-Term Investments

	1986	1985
Cash and (bank overdraft)	$ (3,194,289)	$ (826,938)
Government of Canada	—	2,691,572
Other corporate investments	26,521,494	30,268,990
Long-Term investments maturing within one year	6,569,572	7,637,583
	$29,896,777	$39,771,207

Short-term investments are held to meet current obligations such as claims requiring immediate settlement.

6. Investments

	1986	Market Value	1985	Market Value
Bonds and debentures at par	$235,363,337		$232,815,274	
Less unamortized discounts or premiums	6,206,506		9,445,792	
Amortized cost	229,156,831	$244,629,774	223,369,482	$237,261,623
Equities	29,923,246	31,344,259	7,588,272	9,875,828
	$259,080,077	$275,974,033	$230,957,754	$247,137,451
Mortgages	26,259,272		29,760,819	
	$285,339,349		$260,718,573	

Since mortgages are not publicly traded, their market value at year-end has not been determined.

7. Land, Building, Office Furnishings and Computer Equipment

	Cost	Accumulated Depreciation	Net Book Value 1986	Net Book Value 1985
Land	$ 162,195	$ —	$ 162,195	$ 162,195
Building	2,692,675	1,044,000	1,648,675	1,408,478
Office furnishings	710,405	367,568	342,837	142,054
Computer equipment	158,010	57,134	100,876	102,127
Leasehold improvements	27,812	13,906	13,906	21,860
	$3,751,097	$1,482,608	$2,268,489	$1,836,714

8. Accounts Payable

Accounts payable include:

	1986	1985
Estimated merit rebates	$6,568,724	$6,548,299
Assessment refunds	984,677	456,683
Employee benefits liability	761,882	702,336
Other payables	772,061	819,258
	$9,087,344	$8,526,576

9. Compensation Payable

Compensation Payable includes the following:

- the estimated cost to the Board of reported claims
- the estimated cost of claims yet to be reported based on the claims settlement experience and
- the estimated amount required to meet the future payments to claimants and other recipients.

Compensation Payable includes estimated costs of $305,851,967 as determined by a yearly actuarial evaluation and limited compensation costs of $277,475. The change in Compensation Payable each year is recorded as part of Compensation Expenditure (Note 12).

10. Appropriated Injury Fund Balance

	Disaster Reserve	Second Injury Reserve	Wascana Rehabilitation Reserve	Pension Rehabilitation Reserve	Total
Balance January 1, 1985	$4,822,866	$2,376,879	$8,778,353	–	$15,978,098
Appropriated in 1985	2,789,918	–	1,184,100	–	3,974,018
Balance December 31, 1985	7,612,784	2,376,879	9,962,453	–	19,952,116
Appropriated in 1986	1,500,000	–	(67,753)	$558,000	1,990,247
Balance December 31, 1986	$9,112,784	$2,376,879	$9,894,700	$558,000	$21,942,363

The reserves have been established by the Board within the provisions of The Workers' Compensation Act, 1979 to avoid undue and unfair burdens to the employers in future years with the payments to be made in those years in respect of costs and injuries that have previously occurred.

11. Assessment Revenue

The assessment revenue reported is net of the following:

	1986	1985
Merit rebate	$(6,568,724)	$(6,548,299)
Government of Canada Assessment	$ 1,664,907	$ 1,833,644

12. Compensation

Compensation expenditure includes the following:

	1986	1985
Compensation payments	$40,852,686	$37,837,434
Pension payments	21,020,990	26,570,351
Change in compensation payable	13,193,506	13,136,946
	$75,067,182	$77,544,731

13. Rehabilitation Expense

The Board is participating in the construction of The Wascana Rehabilitation Centre to better assist injured workers in returning to work and in lessening or removing any handicap resulting from a compensable injury. During 1986 a payment of $2,979,098 was made toward construction of the hospital and consulting fees of $30,656 were paid relating to this project. The Wascana Rehabilitation Reserve has been reduced by these payments.

14. Related Party Transactions

Included in these financial statements are expense amounts resulting from routine operating transactions conducted at prevailing market prices with various Saskatchewan Crown controlled departments, agencies and corporations with which the Board is related.

Account balances resulting from these transactions are included in the statement of financial position and are settled on normal trade terms.

15. The comparative financial statements have been reclassified from statements previously presented to conform to the presentation of the 1986 financial statements.

Schedule 1

Schedule of Administration Expenses
Year Ended December 31, 1986

	1986	1985
Salaries	$ 7,562,080	$ 6,858,568
